

## THE MOST VERSATILE PRIVACY FENCE

### SYSTEM IN THE WORLD!

FenceTrac offers a “TRAC” rail fencing system that opens up unlimited possibilities.

### VERSATILE

Choose from almost any infill material to get the look you want. Horizontal, vertical, wood, composite, chain, steel or stucco. Combine steel posts with masonry pillars to create an elegant perimeter fence.

PATENTED U-Channel Rails create a secure and durable fence that accommodates nearly any infill material.

### ECONOMICAL

The hybrid nature of the system means that it is stronger than an all wood fence while costing considerably less than an all steel or stone fence.

The system works equally well providing secure and beautiful fencing in both **residential** and **commercial** environments.

### LOW MAINTENANCE

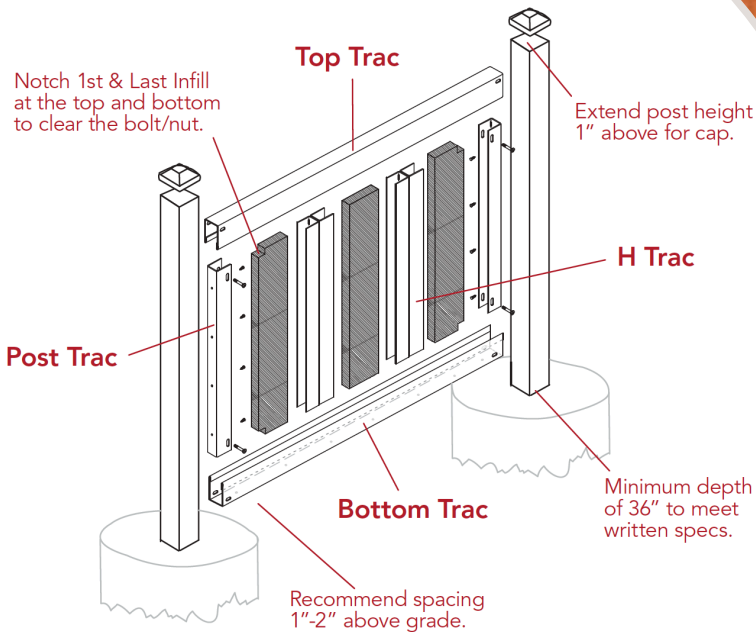

A 10 Year Warranty ensures that the system will last. The modular nature of the system means that if a part is damaged, it can easily be repaired or replaced without the need to repair or replace large sections of fence.
